200 Liter Tank with TC Tech Liner

15

TC Tech Tank Liners are designed to fit cylindrical tanks by Nalge Nunc International and others. Utilization of tank liners avoids costs associated with tank cleaning & cleaning validation. Additionally risks associated with cross-contamination are reduced and tank turnaround time is accelerated. TC Tech tank liners are constructed of the same film materials used in TC Tech Sterile Fluid Handling Bags thereby reducing validation costs. Cylindrical Tanks offered by TC Tech are constructed of HDPE and include graduation markings in liters and gallons.

Specifications

Tanks
HDPE Construction
Gallon & Liter Calibrations
HDPE Cover

Capacity	Dimensions (cm)
50 Liter	33 x 69
100 Liter	46 x 76
200 Liter	56 x 91
300 Liter	61 x 122
400 Liter	71 x 112
550 Liter	79 x 124
750 Liter	91 x 130

Specifications

Liners
LDPE Fluid Contact Surface
Provided Sterile via 25kGy – 40kGy Gamma
Individually Packaged

Options

PVDF Tank Construction
