

# BarbLock™ Ultra-Secure Tubing Retainer

## Cable Tie Replacement

BarbLock on Couplings by Colder Products and Sanitary Fittings by Saint-Gobain

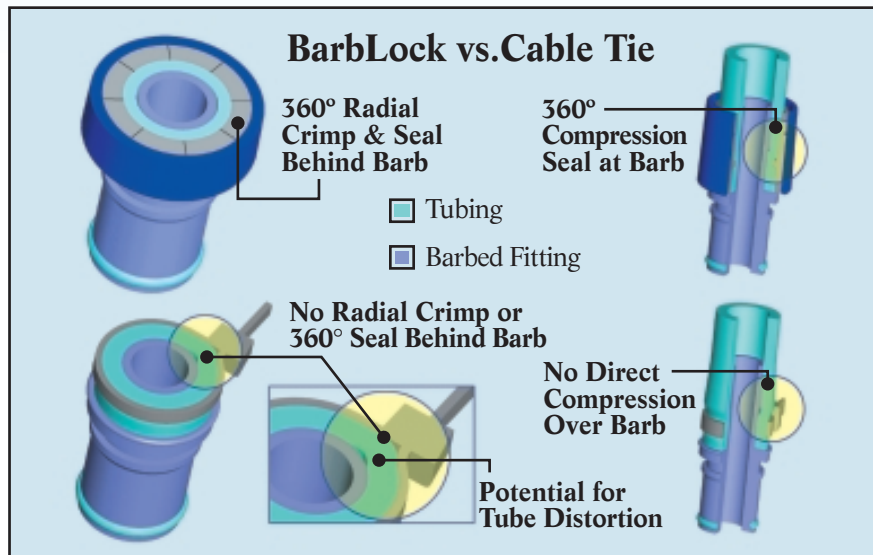

BarbLock on TC Tech 200 Liter Sterile Fluid Handling Bag

BarbLock Pump & Transfer Hose Assemblies

BarbLock Ultra-Secure Tubing Retainer provides a high performance alternative to cable ties. A 360° radial crimp behind the barb provides up to 7 times\* the pull-off resistance of cable ties. A 360° seal over the barb offers leak protection not found with cable ties. BarbLock is recommended for use with C-Flex®, Silicone, Pharmed, and PVC tubing products. Available on TC Tech Sterile Fluid Handling Bags, as Pump & Transfer Hose assemblies, or for individual sale. Custom sizes available to fit your existing barbed fitting.

\* 7-1 pull-off results obtained using 1/2" ID x 3/4" OD 50 durometer silicone tubing and Sani-Tech 1.5" polypropylene fitting.
